

GAP

CONNECTOR FOR DECKING

TWO VERSIONS

Available in A2 | AISI304 stainless steel for excellent corrosion strength (GAP3) or in galvanized carbon steel (GAP4) for good performance at a low cost.

NARROW JOINTS

Ideal for making floors with narrow joints between boards (from 3,0 mm). Fastening is performed before the board is positioned.

WPC AND HARDWOODS

Ideal for symmetrically grooved boards such as those in WPC or high-density wood.

GEOMETRY

GAP 3 A2 | AISI304

GAP 4

WOOD PLASTIC COMPOSITE (WPC)

Ideal for fastening WPC boards. Can also be used for fastening on aluminium using SBN A2 | AISI304 screws.

GAP 3 GROOVE GEOMETRY

SYMMETRICAL GROOVING

Min. thickness	F	3 mm
Min. recommended height GAP 3	H	8 mm

GAP 3 INSTALLATION

First board: fix it with suitable screws, left visible or hidden thanks to specific accessories.

Insert the GAP3 fastener into the groove cut so that the clip's central tab adheres to the groove in the board.

Fix the screw in the central hole.

Position the next board by inserting it into the GAP3 fastener so that the two tabs adhere to the groove in the board.

Using the CRAB MINI clamp, tighten the two boards until the gap between them is 3 or 4 mm depending on aesthetic requirements (see product page 395).

Repeat the operations for the remaining boards.
Last board: repeat step 01.

GAP 4 GROOVE GEOMETRY

SYMMETRICAL GROOVING

Min. thickness	F	3 mm
Min recommended height GAP 4	H	7 mm

GAP 4 INSTALLATION

First board: fix it with suitable screws, left visible or hidden thanks to specific accessories.

Insert the GAP4 fastener into the groove cut so that the clips' central tab adheres to the groove in the board.

Secure the screws in the two available holes.

Position the next board by inserting it into the GAP4 fastener so that the two tabs adhere to the groove in the board.

Using the CRAB MINI clamp, tighten the two boards until the gap between them is 4-5 mm depending on aesthetic requirements (see product page 395).

Repeat the operations for the remaining boards.
Last board: repeat step 01.
